

LS INFRA

LS Infra is an infrared light that relieves the suffering caused by sore muscles and joints. The comfortable heat created by the infrared light penetrates deep into the skin, stimulates blood circulation and warms up the muscles. While the muscles are warm and relieved, they automatically stretch and relax. At the same time, the blood circulation helps your body rid itself of impurities and quickly sends oxygen-rich blood to stressed or aching muscles, causing an effective pain relief.

Ease of use, height and head orientation can be adjusted. 21 centimeter diameter head with metal protection grip. Available in 150W or 250W bulb.

It can be adapted to: trolley stand, table clamp (included in standard version), rail support, wall support and extension wall arm.

LS INFRA

Technical Details	
Light source	IR E-27 150W
	IR E-27 250W
